

Number Hunt

Follow the instructions below. Move from number to number, writing down the answers in the boxes.

START AT ZERO

1. Move forward by 5 dozen.
2. Divide this number in half.
3. Go to the next higher number that is a SQUARE.
4. Add your total number of fingers and toes to your number.
5. Go up to the next multiple of 11.
6. Divide your number by 3.
7. Double your number.
8. Go up to the next multiple of 7.
9. Double your number.
10. Add 2 to your number.
11. Divide your number by 2.
12. Add (2×5) to your number.

Is the answer in this last box the same as the answer in the first box? If so, you did everything perfectly! If not, go back and find your mistake!
